

**Short instruction for new local investigators  
FASSprosp study**

1. Clinical data and echo measurements are submitted by using an electronic reporting system; MediCase <https://www.medicase.se/en/>
2. Echo images and clips in DICOM are submitted to a Core. lab by using an FTPS-server.
3. Usernames, passwords and instructions for MediCase and the FTPS-server will be e-mailed to you by contacting any of us, below.
4. A folder including all study documents will be sent by email as attachments or through a Dropbox link to your e-mail.

If you have any questions or concerns regarding this study, don't hesitate to contact us.
