INNOVATION in Pediatric Cardiology - how to realise ideas -

Interactive workshop for Junior Scientists organized by Educational Committee AEPC

Scope: Discuss on innovations and ideas in pediatric cardiology together with junior pediatric cardiologists, engineers and presenting seniors, who successfully developed their own projects.

Participants (max. 25): Addressing ambitious scientists being involved or interested in innovative research and development. Participants may have ideas at a theoretical stage or working on it – as (thinking of) starting their own research group.

Aim: Facilitate support how to develop further on ideas and how to bring them into practise (brainstorming, do right experiments to prove the development, get funding, pass regulations).

Meeting place: Inspiring and quiet surrounding in Tuscany. Full accommodation provided.

Responsible for organization:

Local: Philipp Bonhoeffer, Silvia Schievano
EC: Ruth Heying, Ornella Milanese

October, 23 – 26, 2025

Montecastelli, Tuscany, Italy
