

ASSOCIATION FOR EUROPEAN PAEDIATRIC AND CONGENITAL CARDIOLOGY

# AEPC LOGBOOK

**Documentation of the competency-based specialisation in Paediatric and Congenital Cardiology**

## 1 - PERSONAL INFORMATION

Personal data of the fellow in Paediatric Cardiology	
Name:	
First name:	
Title:	
Address:	

Final exam in medicine	
University:	
City:	
Date:	

Approbation as doctor	
University:	
City:	
Date:	

## 2 - REQUIRED PAEDIATRIC RESIDENCY

Before starting as a trainee in Paediatric and Congenital Cardiology, the trainee should have followed a training in Paediatrics also containing a minimum of 6 months in Neonatology / Paediatric Intensive Care.

The following training in Paediatrics in combination with Paediatric Cardiology specialisation is required to be able to assign for the logbook assessment:

- 3 years of Paediatrics + 3 years of Paediatric Cardiology
- 4 years of Paediatrics + 2 years of Paediatric Cardiology
- 4 years of Cardiology + 2 years of Paediatric Cardiology

### **Training in Paediatrics:**

**Certification of the supervisor / trainer:**

Herewith I confirm, that the basic training requirements in Paediatrics before starting the education in Paediatric and Congenital Cardiology have been fulfilled.

Signature of trainer / supervisor:

Date:

### 3 – COMPETENCE IN PAEDIATRIC AND CONGENITAL CARDIOLOGY

The training in Paediatric Cardiology covers a period of 2 or 3 years depending on the previous education. It should contain training in adult congenital cardiology equivalent to a period of a minimum of 3 months.

#### 3.1 Technical skills

	Minimum recommended numbers <i>(divided in 1<sup>st</sup>/2<sup>nd</sup>/3<sup>rd</sup> year)</i>	Numbers done
<b>ECG</b>		
• Interpret and report electrocardiograms on both inpatients and outpatients	150	
• Holter monitor ( <i>supervision and reporting</i> )	50	
<b>Echocardiography</b>		
All studies should be reviewed and have a finalized consultant report.		
• Transthoracic ECHO: of which	500	
<b>A.</b> patients with cardiac pathology:	400	
patients with normal cardiac anatomy	100	
<b>B.</b> under supervision of a paediatric echocardiographer / cardiologist	300	
independent investigation by the trainee	200	
• Transoesophageal ECHO:	50	
of which being a primary operator:	25	
• Fetal echocardiograms ( <i>observation, not necessarily primary operator and associated counselling</i> )	20	
<b>Exercise tests</b>		
• Interpreted and reported exercise tests	50	
<b>24 h blood pressure measurements</b>	25	
<b>Interpretations of chest X-rays</b>	100	
<b>Cardiac Imaging</b>		

ASSOCIATION FOR EUROPEAN PAEDIATRIC AND CONGENITAL CARDIOLOGY

<ul style="list-style-type: none"> <li>• Interpretation of results of cardiovascular magnetic resonance, thoracic CT and radionuclide imaging CT</li> </ul>	10	
<b>Cardiac catheterization and</b>		
<ul style="list-style-type: none"> <li>• Participate and report cardiac catheterisation and haemodynamics including patients with balloon atrioseptostomy</li> </ul>	50	
<b>Electrophysiological studies and Ablation</b>		
<ul style="list-style-type: none"> <li>• Participate in clinical decision-making for electrophysiology study/ablation procedure, including observation of procedures and interpretation of reports</li> </ul>	10	
<b>Direct current cardioversion</b>		
	5	
<b>Pacemaker</b>		
<ul style="list-style-type: none"> <li>• Observation of pacemaker implantation</li> </ul>	5	
<ul style="list-style-type: none"> <li>• Participating in testing permanent pacemaker function</li> </ul>	20	
<ul style="list-style-type: none"> <li>• Performance of pacemaker testing:</li> </ul>	20	
<b>Pericardial aspiration</b>		
<ul style="list-style-type: none"> <li>• Demonstration of competency in pericardial aspiration under supervision</li> </ul>	2	
<b>Patient care</b>		
<ul style="list-style-type: none"> <li>• In-patients for whom the trainee is responsible</li> </ul>	200	
<ul style="list-style-type: none"> <li>• Manage patients in an ambulatory care (out-patient) setting</li> </ul>	200	
<ul style="list-style-type: none"> <li>• Intensive Care patients followed</li> </ul>	50	
<ul style="list-style-type: none"> <li>• Management of adult patients with congenital heart disease</li> </ul>	50

### 3.2 Assessment of general knowledge

Basic knowledge of/in:	Certified (yes/no):
• Etiology, genetics, pathophysiology, epidemiology of cardiovascular disease and co-morbidities.	
• Clinical presentation of CHD.	
• Diagnostic methods in the specific CHD.	
• Medical and interventional treatment of CHD.	
• Principals of multidisciplinary work.	
• Principals of communication with patients and parents.	
• Ethical and juridical background of medical actions.	
• Measures to ensure quality management.	

Signature of trainer / supervisor:

Signature of trainee:

Date:

### 3.3 Assessment of clinical experience

The trainee has been involved in the diagnoses and treatment of the most common congenital and acquired cardiac diseases. The sufficient experience is reflected by the following number of patients:

Non-cyanotic cardiac defects	Number of patients
• Atrial septal defect	
• Partial anomalous pulmonary venous connection(s)	
• Ventricular septal defect	
• Atrioventricular septal defect	
• Patent arterial duct	
• Aorto-pulmonary window	
• Pulmonary stenosis	
• Ebstein anomaly of the tricuspid valve	
• Double chambered right ventricle	
• Aortic stenosis	
• Coarctation of the aorta and interrupted aortic arch	
• Mitral valve disease	
• Double discordance (L-TGA)	
• Coronary artery fistula	

Cyanotic cardiac defects	Number of patients
• Pulmonary atresia	
• Critical pulmonary stenosis	
• Tetralogy of Fallot	
• Transposition of the great arteries	
• Double outlet right ventricle	
• Truncus arteriosus	
• Hypoplastic left heart syndrome	
• Total anomalous pulmonary venous connection	
• Univentricular atrioventricular connection	

ASSOCIATION FOR EUROPEAN PAEDIATRIC AND CONGENITAL CARDIOLOGY

<b>Cardiovascular symptoms and disorders</b>	<b>Number of patients</b>
• (Pre)-Syncope	
• Pulmonary hypertension	
• Inflammatory cardiovascular disease	
• Cardiomyopathies	
• Endocarditis	
• Myocarditis	
• Acquired valvular diseases	
• Pericardial diseases	
• Cardiac tumours	
• Coronary abnormalities	

<b>Cardiac arrhythmias</b>	<b>Number of patients</b>
• Supraventricular arrhythmias	
• Ventricular arrhythmias	
• Complete Atrio-ventricular block	
• Inherited arrhythmia syndromes	

<b>Fetal cardiology</b>	<b>Number of cases</b>
• Fetal cardiac evaluation	
• Fetal cardiac malformations	
• Fetal arrhythmia

## **7 – BOARD CERTIFICATION**

### **Statement of the head of the training unit / department:**

Herewith I confirm, that the logbook is a true and accurate record of the trainee's experience and that all training requirements have been fulfilled.

Name & signature of the head of the department:

*(preferably member of the AEPC)*

Date:

### **If a national exam in Paediatric Cardiology is applicable:**

National exam passed:

City:

Date:

Responsible supervisor / trainer:
